Summer Ease

W. & J. SLOANE.
NEW YORK 1901

Chasmar Winchell New York and Pittsburgh

Hand Wrought Willow

THE Willow Furniture illustrated herewith must not be associated with rattan furniture. It is markedly superior in every sense, distinctive in character, more durable, and permits of a much finer finish than rattan. These designs, copied to an extent from imported pieces, have been adapted and rendered more practical by our own designers, and manufactured under our personal supervision to meet the requirements of our trade. They are offered at prices no higher than are asked for inferior goods.

The furniture is finished either natural or colored. The most popular shades are green, light brown and sealing wax red. Other colors are weathered oak, forest green, natural buff, violet, Spanish yellow and enameled white.

We have a fresh importation of attractive Linen Taffetas and Cretonnes in new designs and colorings particularly appropriate for this style of furniture Cushions properly made from these materials, either in plain or figured patterns, may be had by stating the name of the piece for which they are desired.

Prices will be submitted upon application.
